Rick Sanborn, from Chicago, IL,
Dec 1, 1999

✓ The King of ALL OS's

In my occupation we use several different machines and OS's, and I must say if you've never used an Amiga you really have NO idea as to what an OS should behave like. This OS lets you control it, not the other way around. It has a small footprint, and is fast and efficient. It is the finest OS that I've ever seen or used. Try it you'll LOVE it.
